

### **In The Specification**

Please change the specification as indicated below. No new matter has been added. Brackets are being used to indicate deletion, per the Rules, because a strikethrough character would be almost undetectable.

[0019]       **Figs. 8[a]** and **[8b]9** are flowcharts of an exemplary embodiment of the system of the present inventions.

[0077]       Referring now to **Fig. [8b]9**, once created, users may freely search 840 either their own user portion 300 or authority table 22a or both using simple, word-oriented queries or any other query available to the user through database 22, by way of example and not limitation including latent semantic indexing. In a distributed environment, a user query could be communicated to server 30 executing a query handler, and results messaged back to the user query handler.

### **In The Drawings**

The Patent Examiner objected to the drawings because the specification references flowcharts Figure 8a and Figure 8b while the drawings include Figure 8 and Figure 9. The specification has been amended to reference Figure 8 rather than Figure 8a and Figure 9 rather than Figure 8b. No new matter has been added and no new figures are required.
